WEB DEVELOPMENT

Tech Stack HTML, CSS, JavaScript

Chose user interface aesthetics using Photoshop, focusing on visual appeal to enhance user engagement.

Implemented form validation and responsive layout by employing advanced CSS and JavaScript, ensuring accessibility across devices.

Web Page

COSMOS EXPLORER

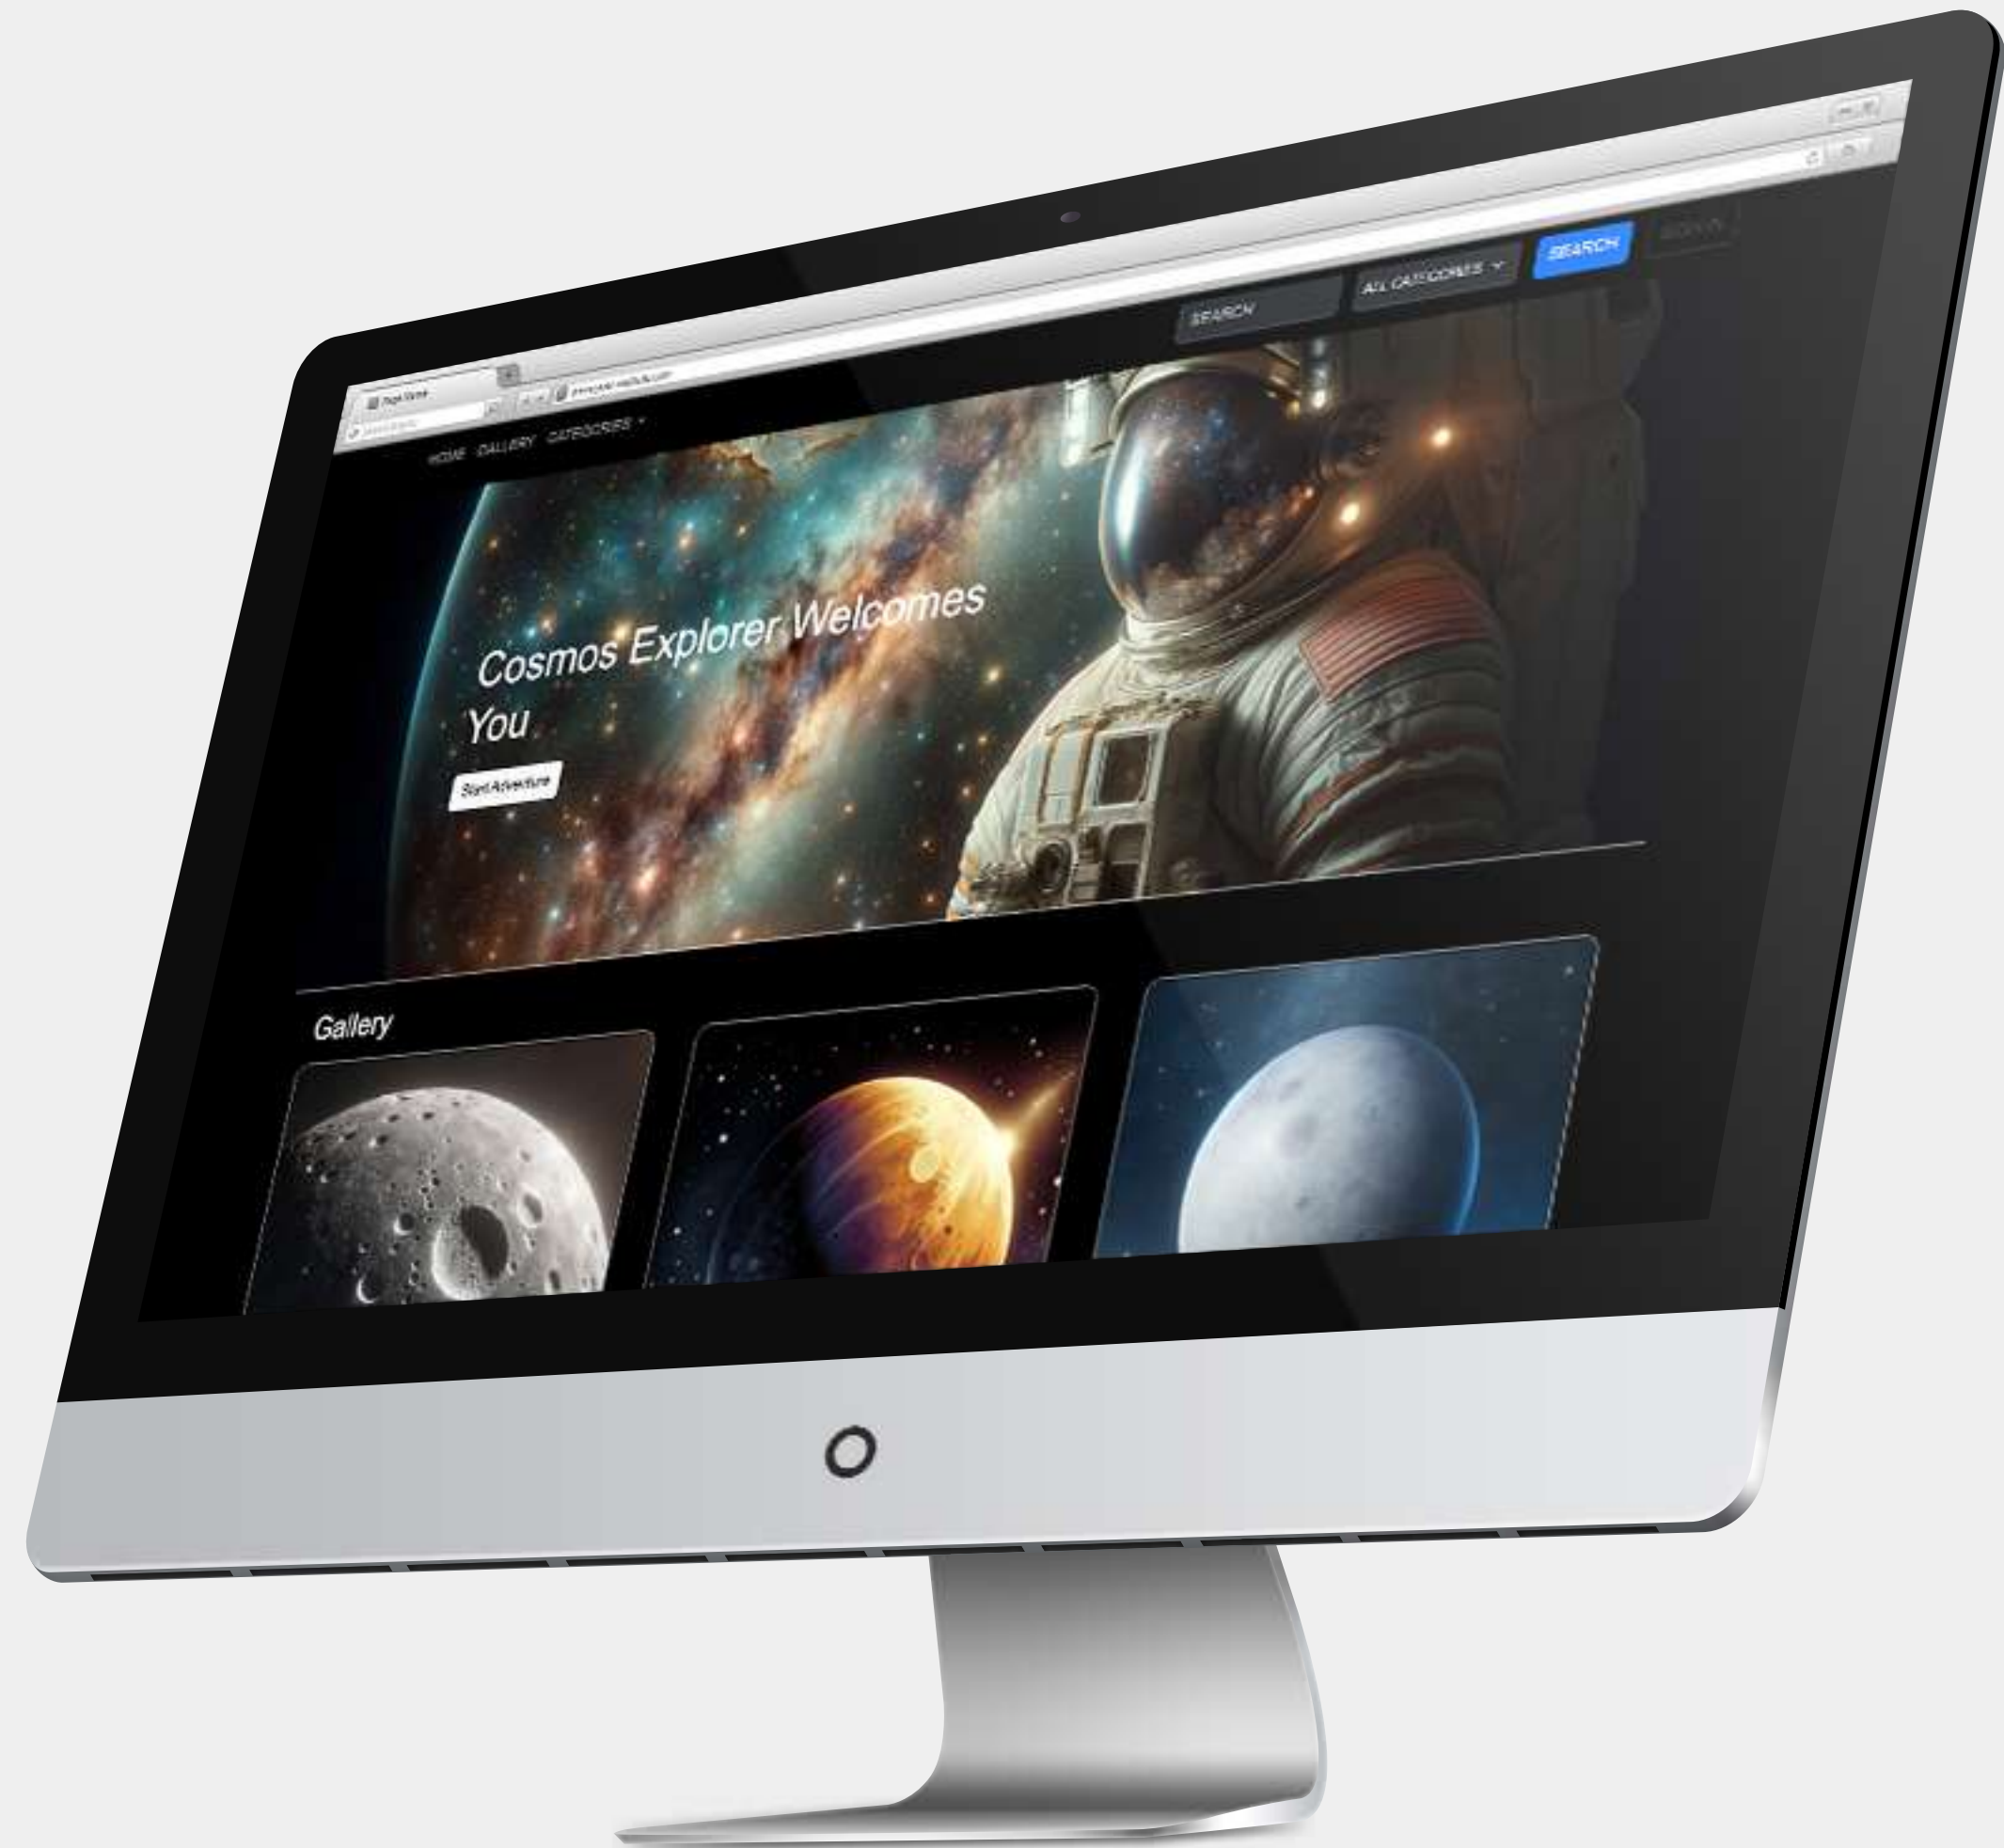

WEB PAGE

Personal Blog System (CMS)

Tech Stack: PHP, HTML, CSS, Bootstrap, GitHub

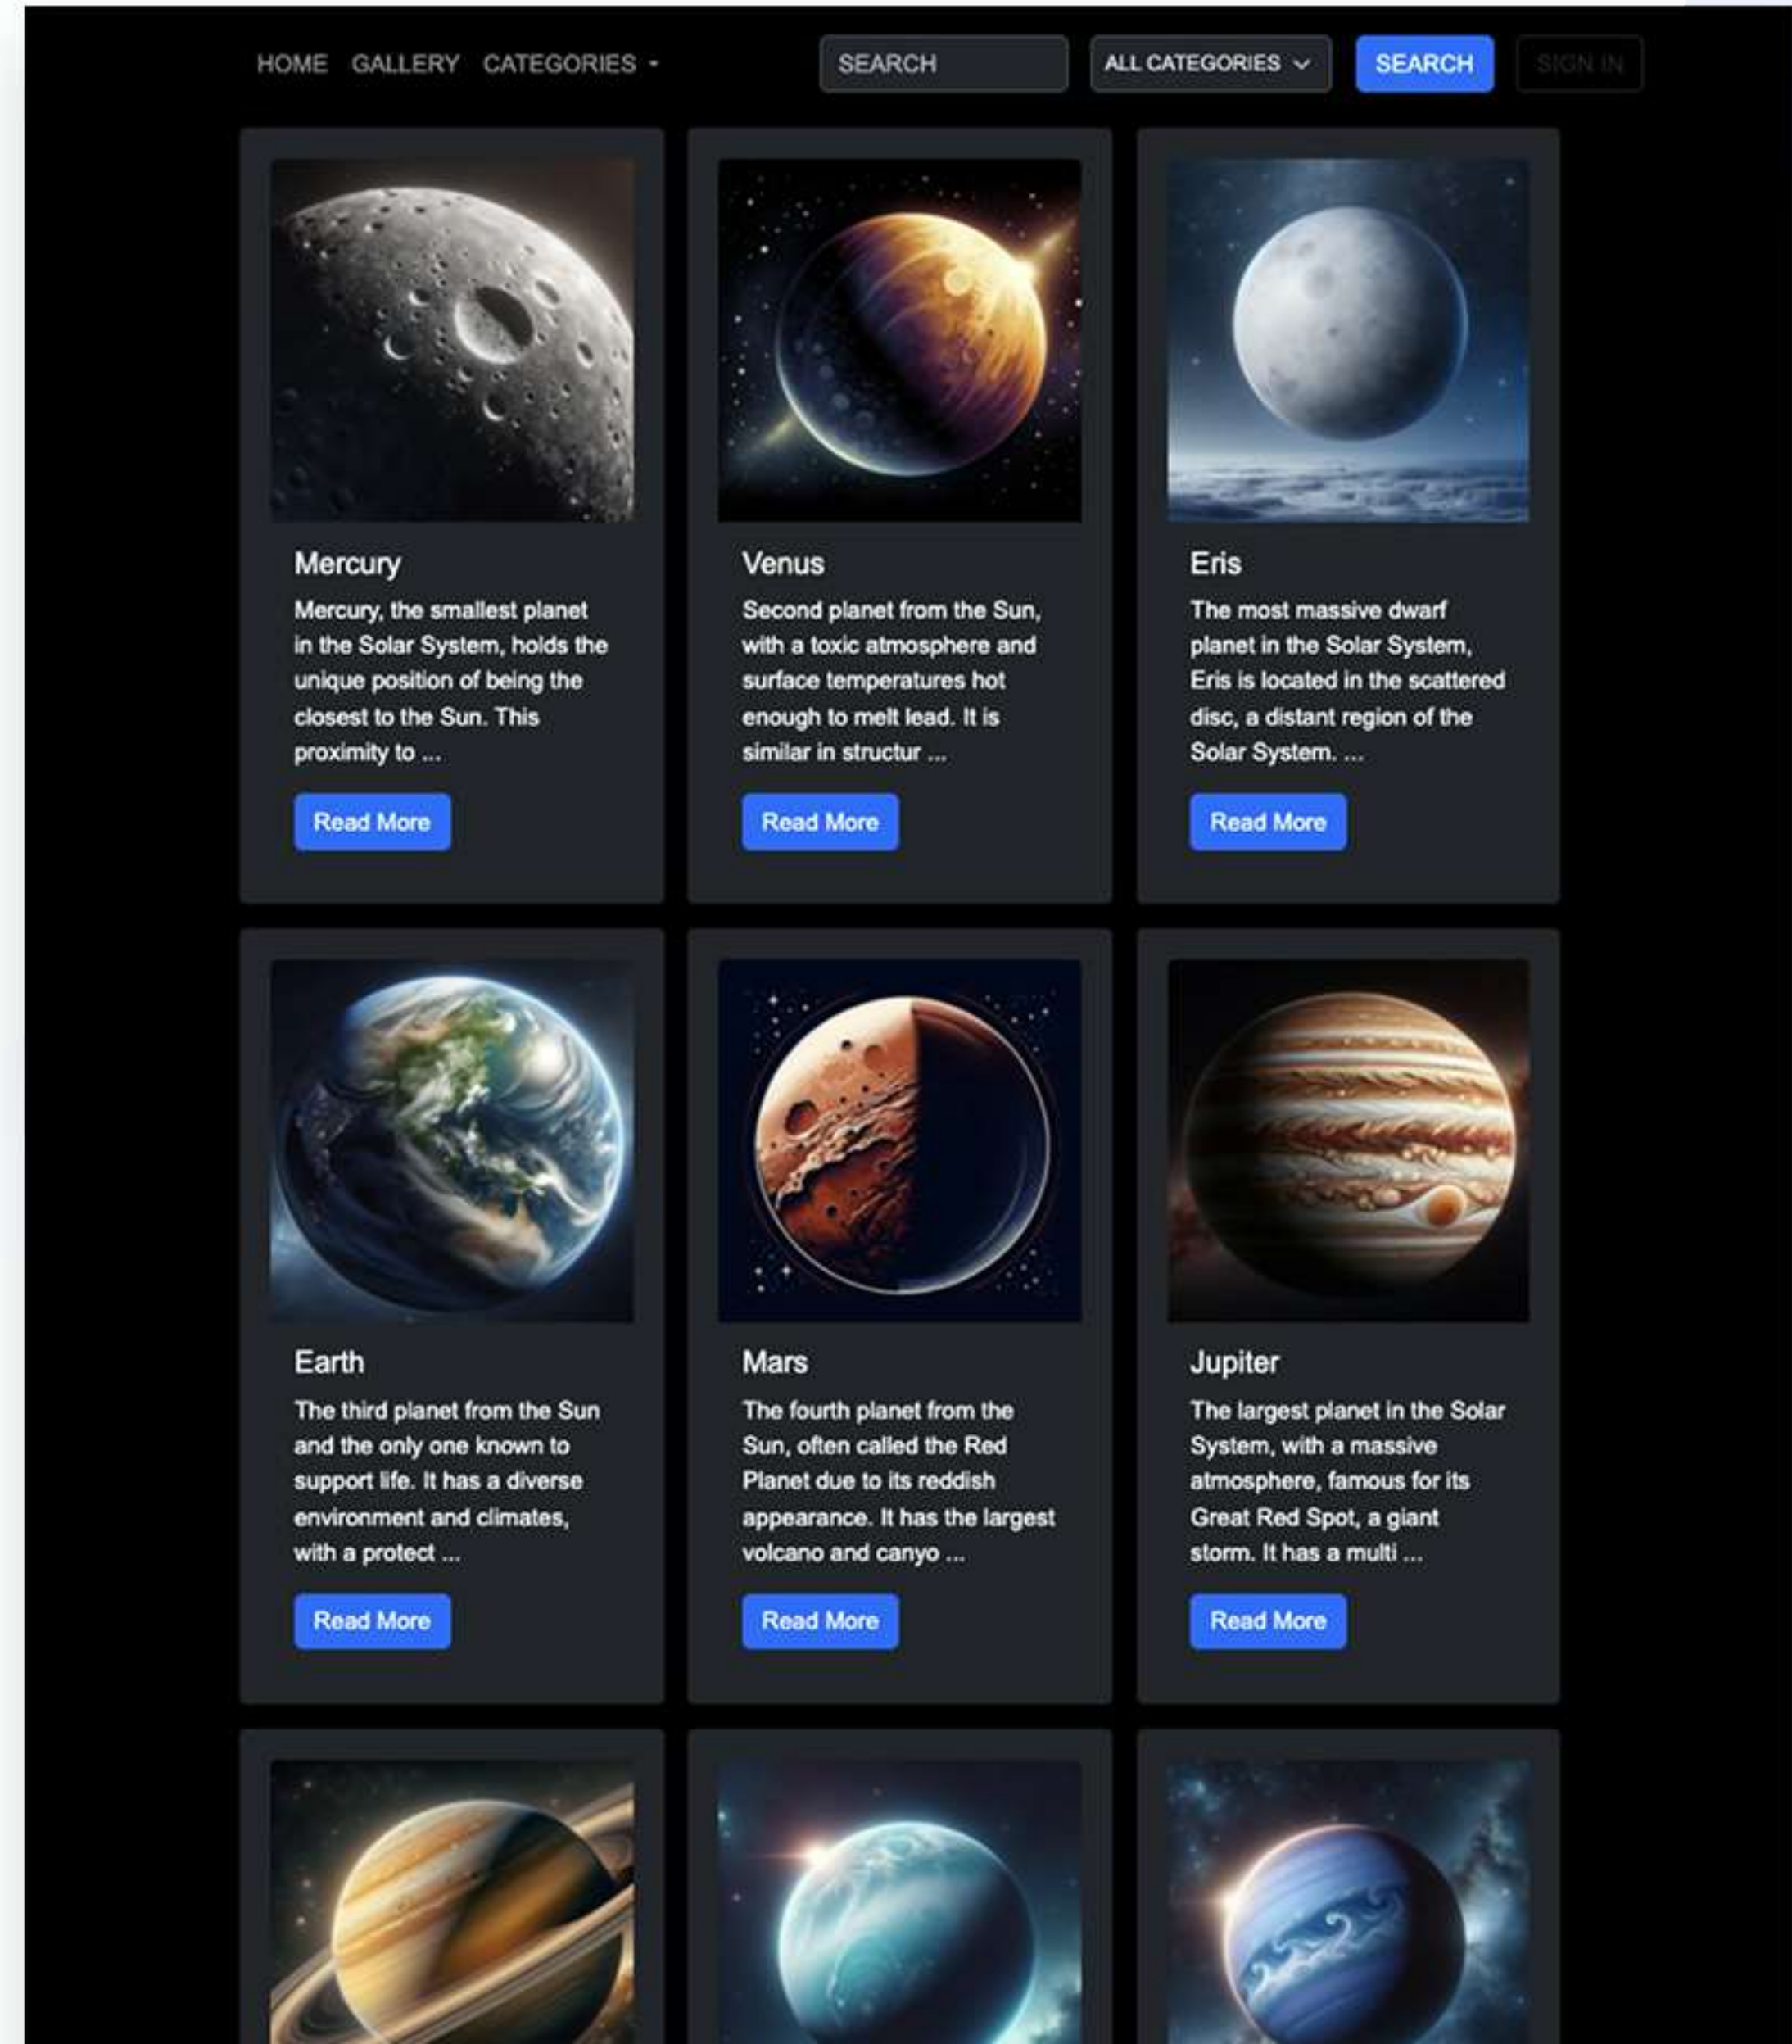

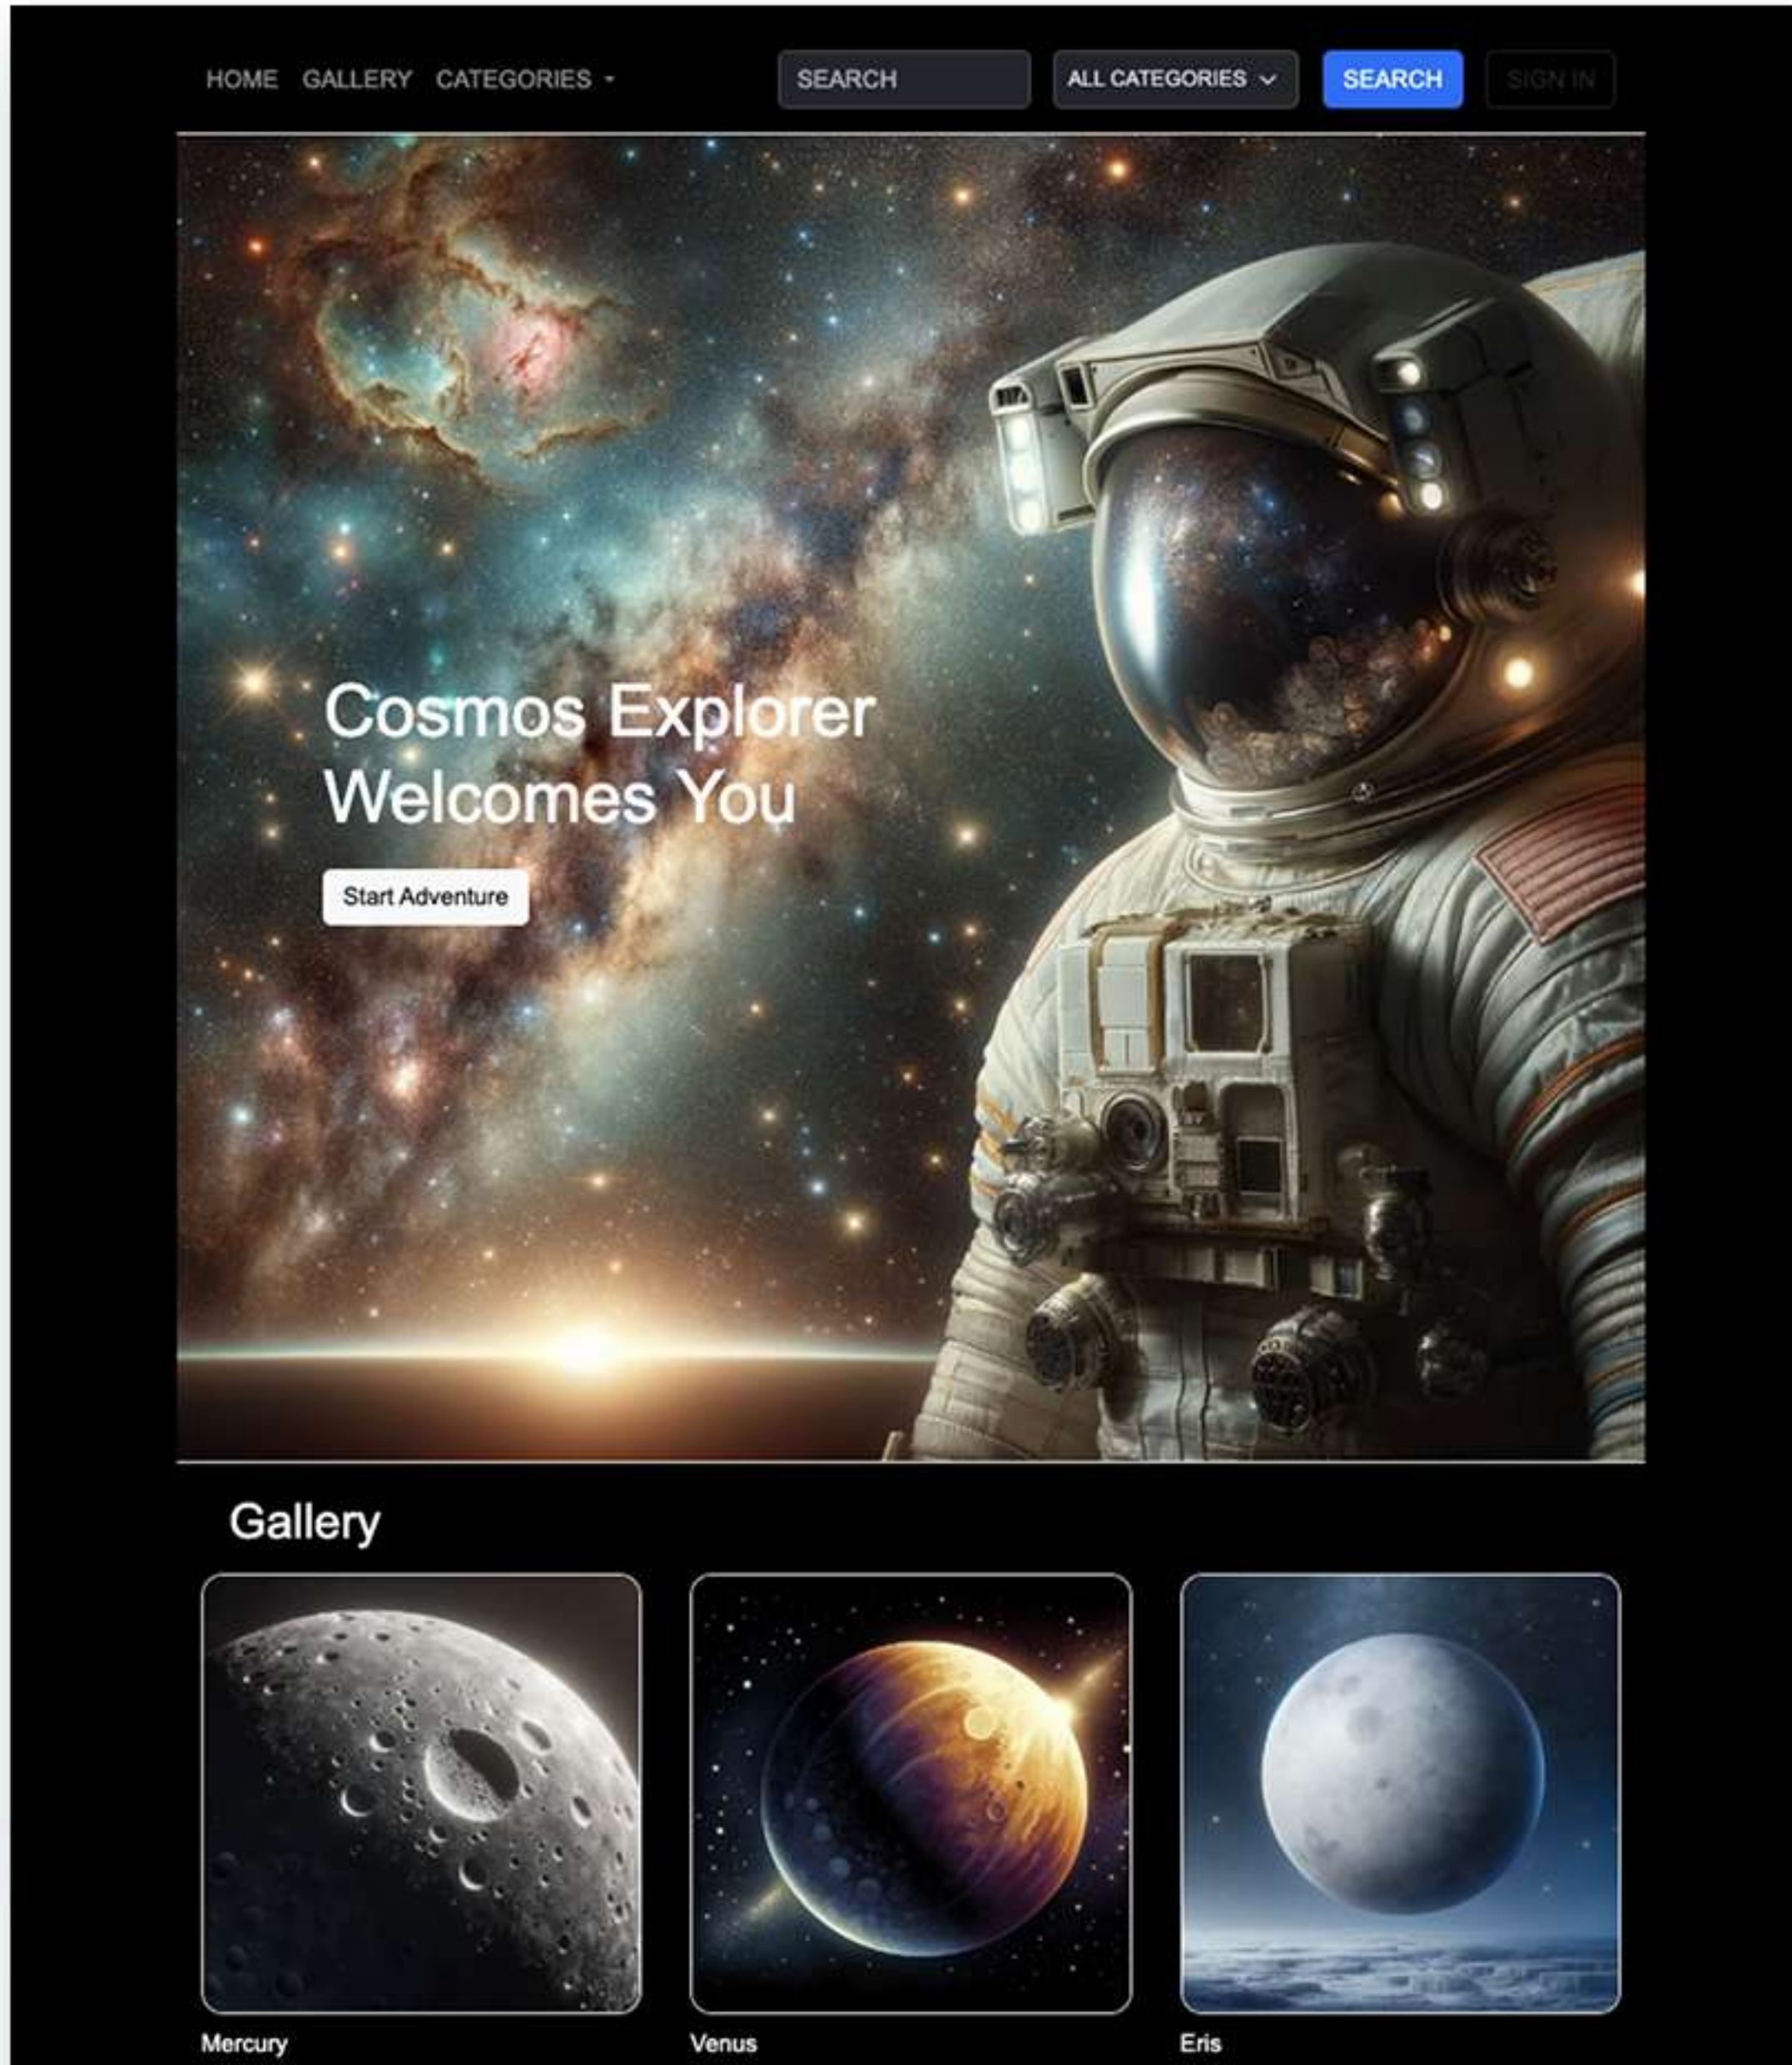

Crafted visually appealing layout for galaxy-themed articles using Photoshop, aiming for thematic consistency. Executed CRUD operations and added advanced search features with pagination utilizing PHP and MySQL to enhance site navigation. Integrated CAPTCHA and responsive design using Bootstrap to support user security and device compatibility. Ensured project integrity through version control with GitHub; deployed project to server, facilitating real-world application.

WORLD OF WARCRAFT CHARACTER OVERVIEW

Mobile Version

Tech Stack:

Ruby on Rails, MySQL, Tailwind CSS, SSL, VPS, GitHub

Official API Integration

Directly fetching game data using the Blizzard API to showcase sophisticated data handling capabilities.

CSV Importation & Dynamic Data Generation

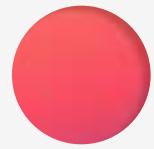

Enriching the database with diverse and authentic data entries through the Faker library.

Responsive Design

Delivering a seamless user experience across devices with TailwindCSS.

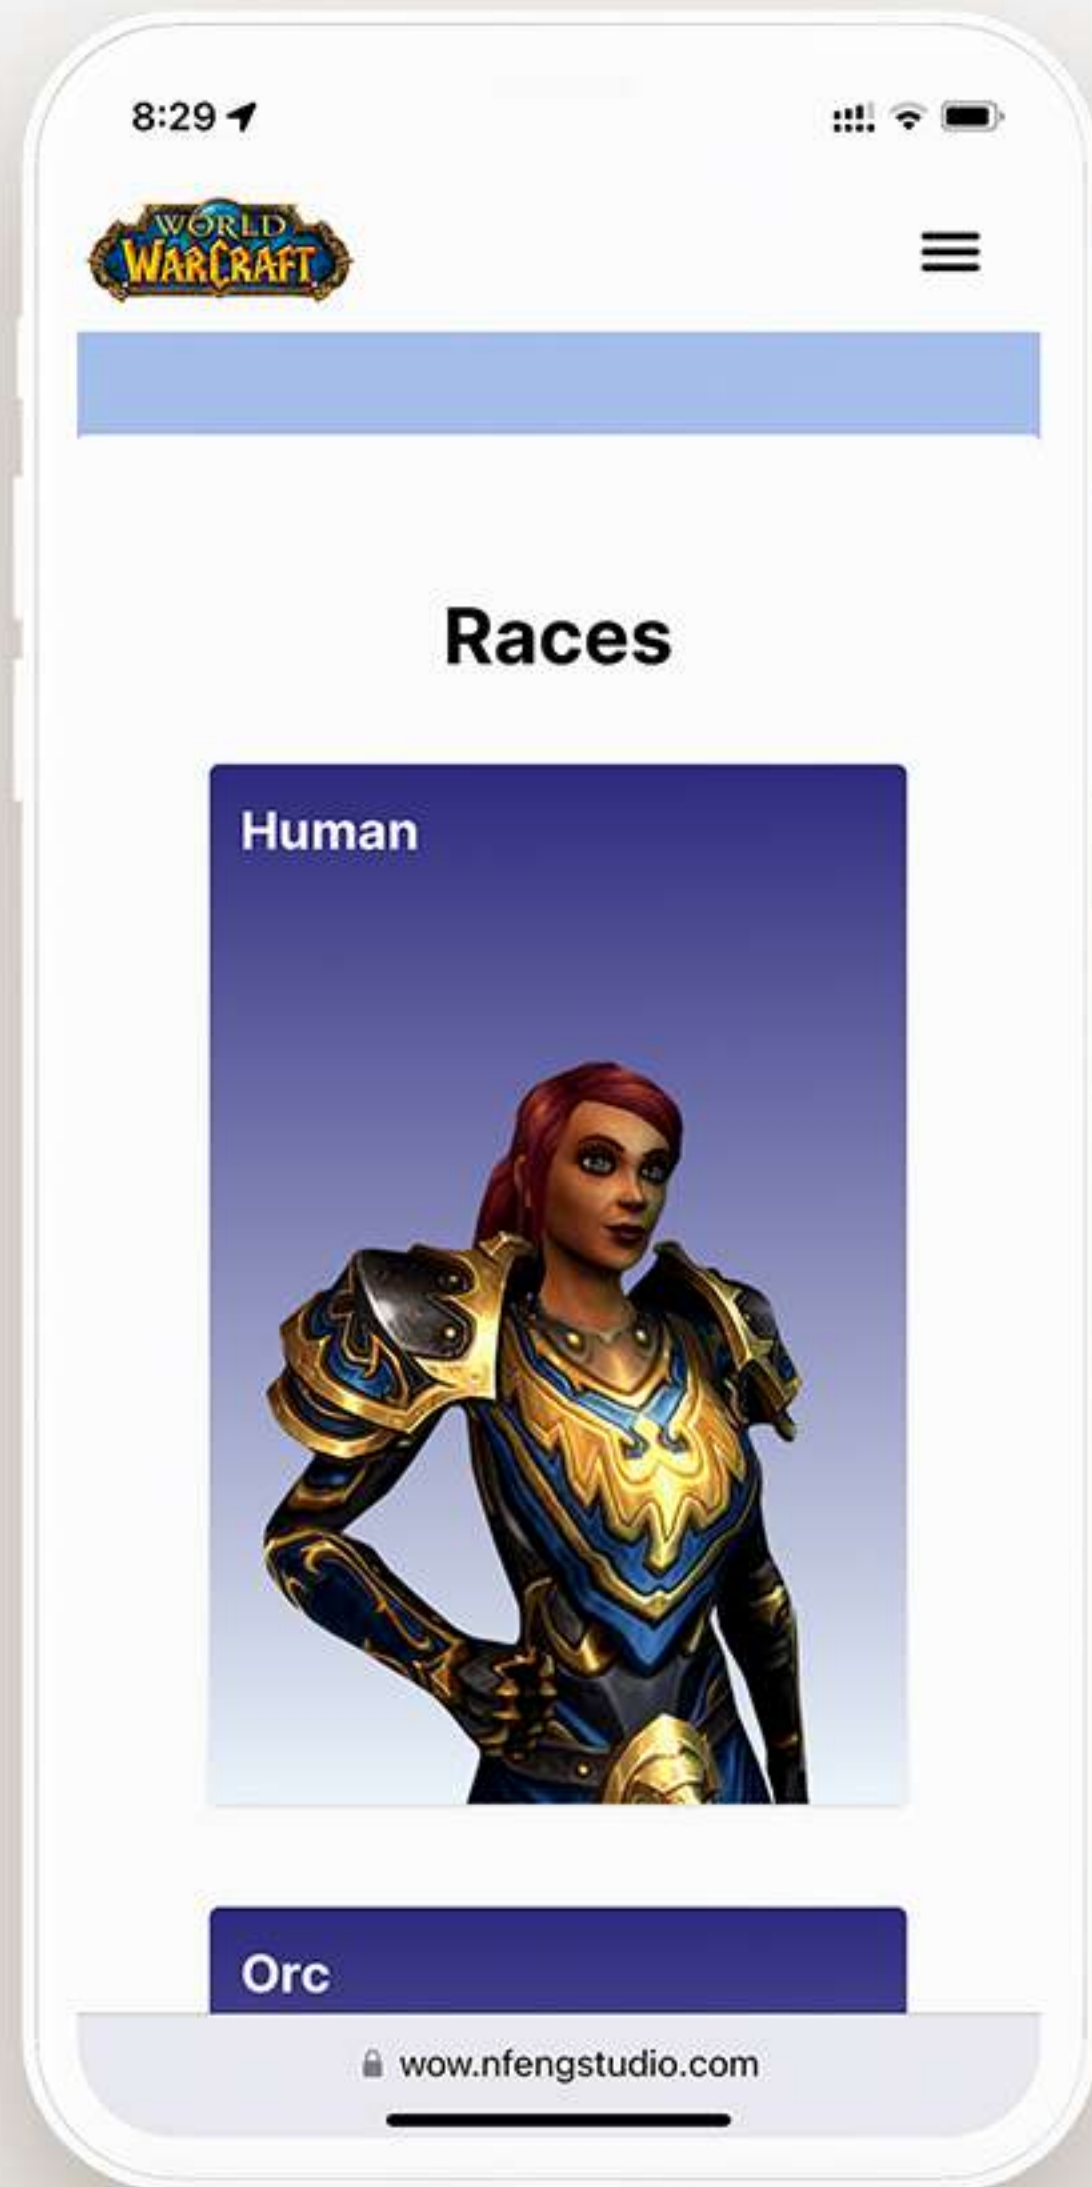

Professional Deployment

Successfully deployed on a VPS, covering everything from server setup and domain configuration to SSL certification for secure access.

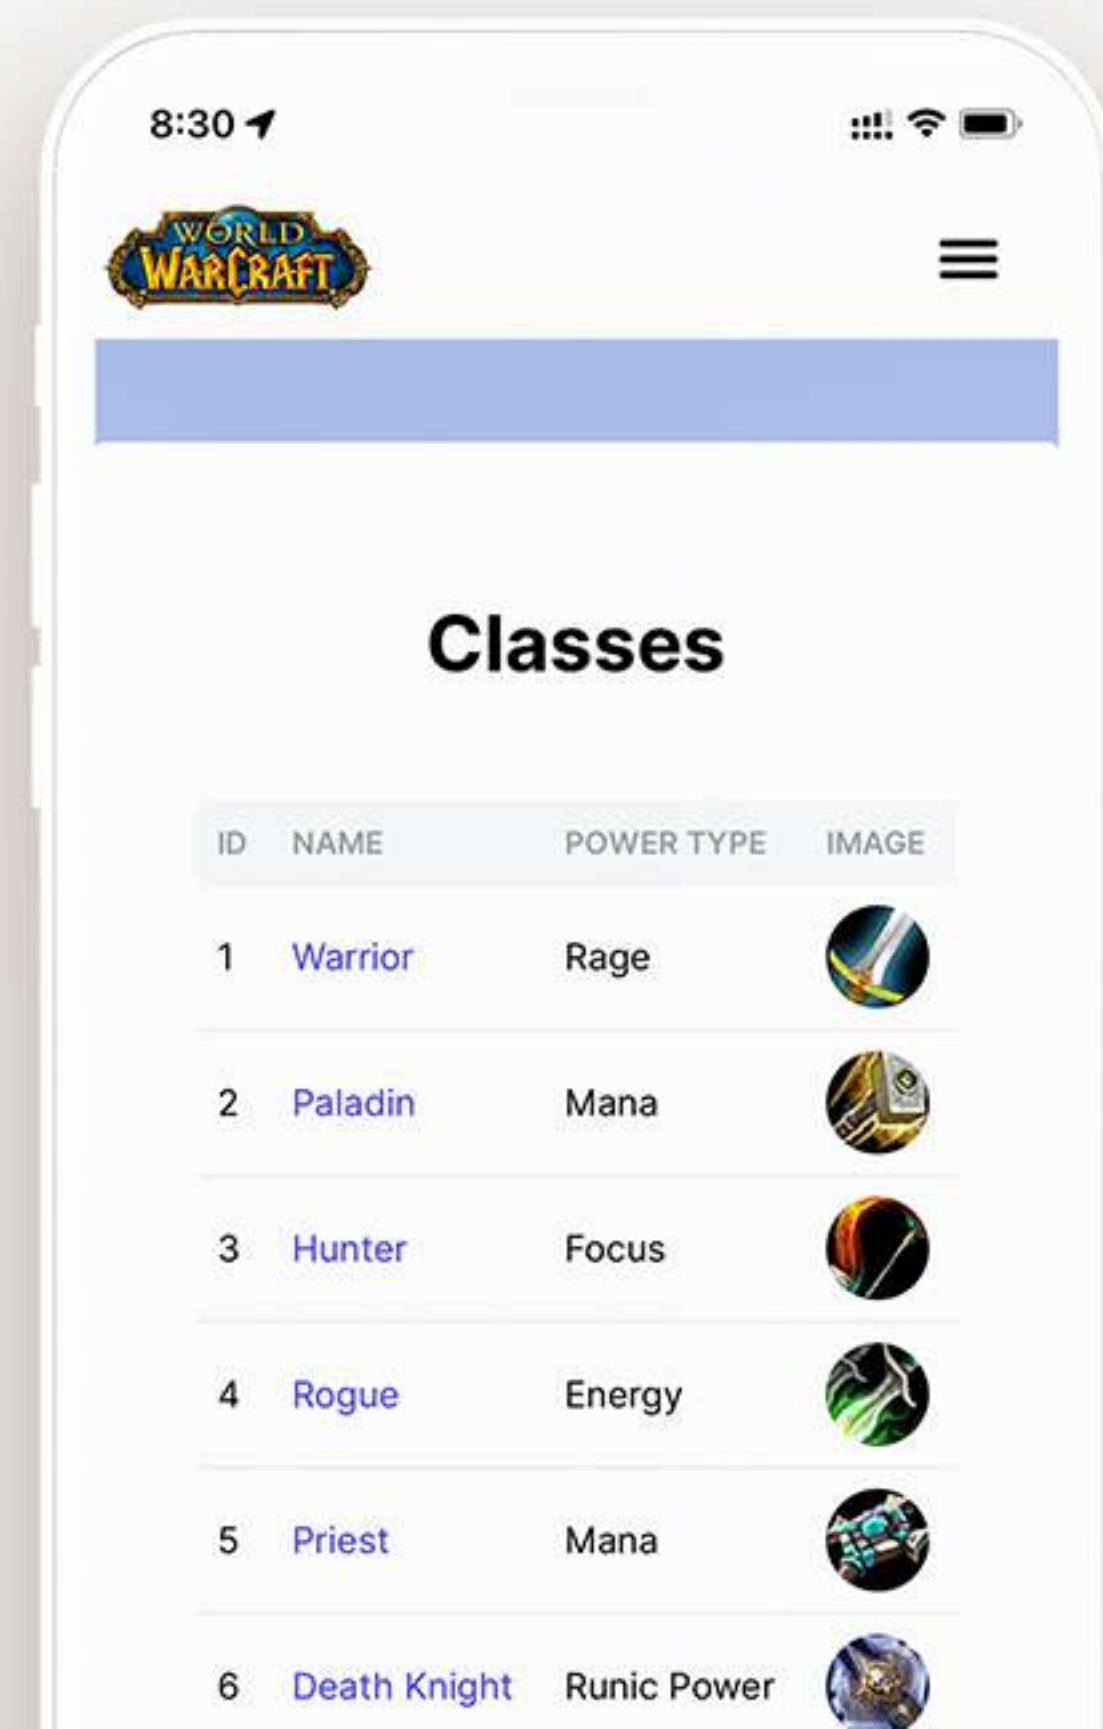

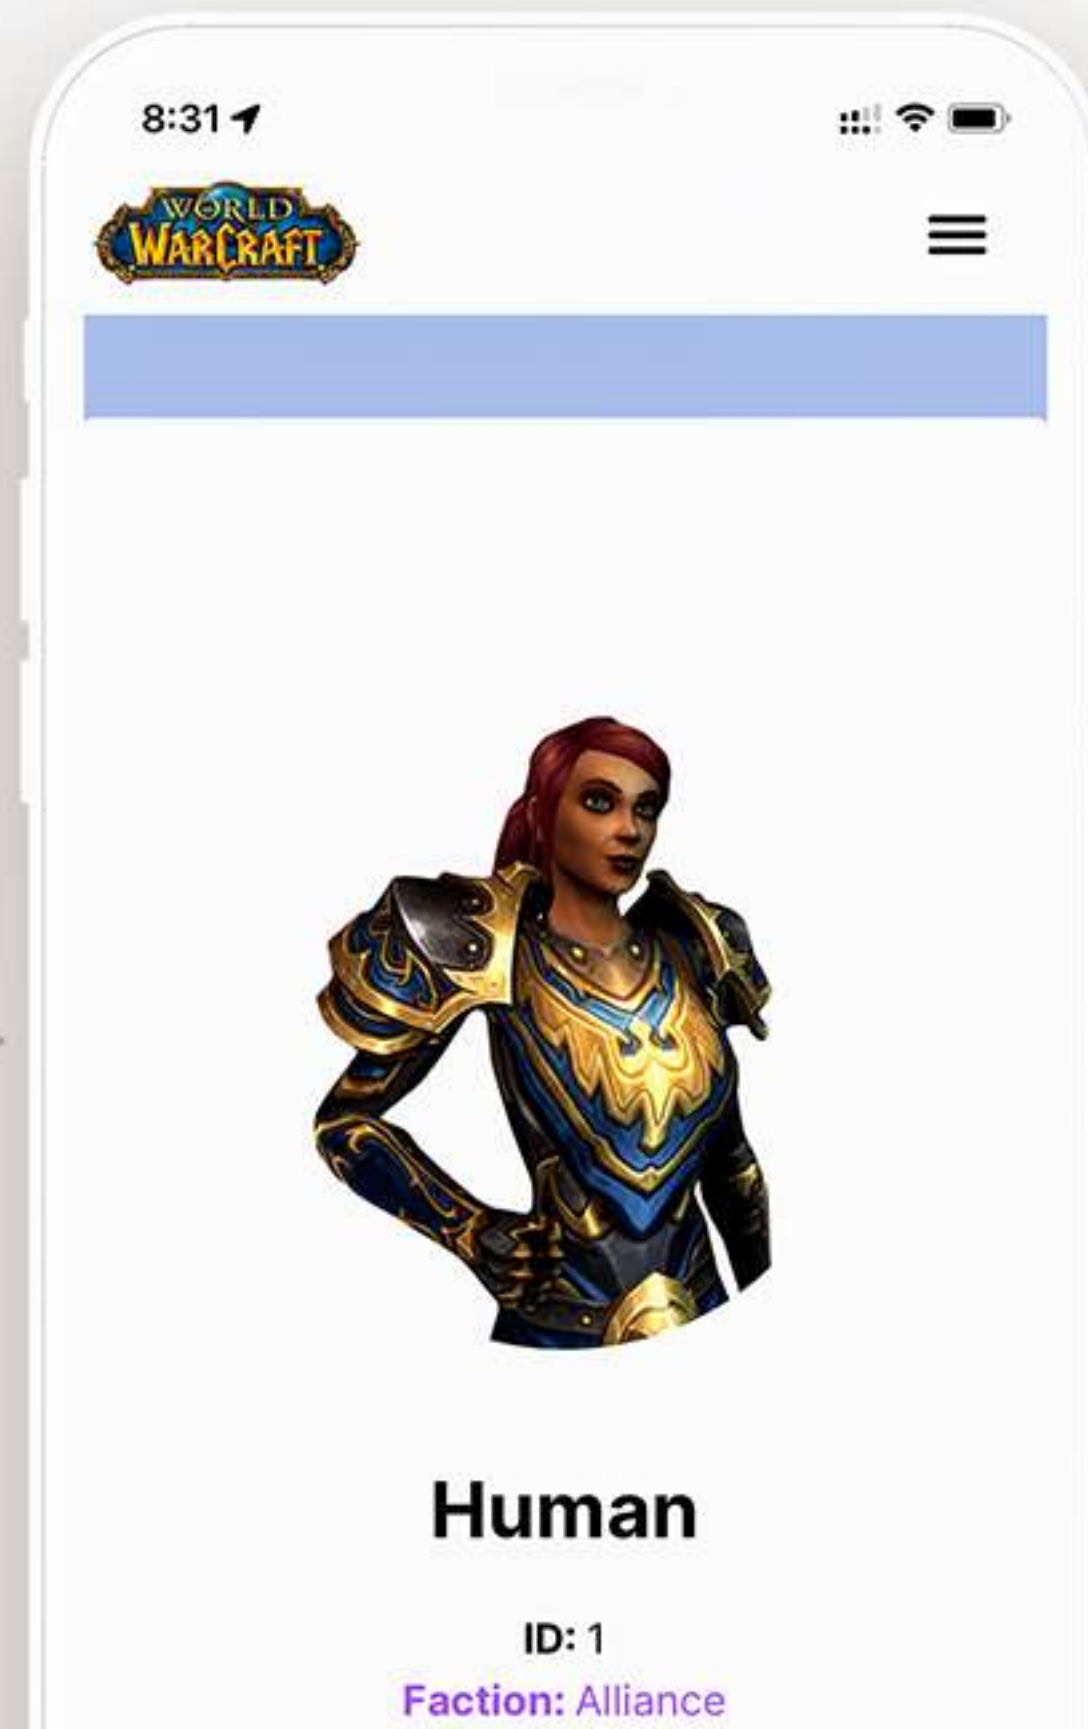

WORLD OF WARCRAFT CHARACTER OVERVIEW

Mobile Version

This project is a fusion of my passion for gaming and my technical skills, offering a rich database featuring races, classes, and specializations from the official World of Warcraft API. With the addition of CSV imports and dynamic content generation using Faker, the database is both comprehensive and vibrant.

Description

Easy and speedy off is possible with a unique new ingredient combination. With a smooth texture, it penetrates into even the slightest irregularities of the nail and adheres to it. A brush-on type that can be painted with a brush. (The contents are the same as the container type.) * Since the thickness does not come out with one coat, it is recommended to apply twice, and it can be used together with ageha base gel.

E-Commerce Platform

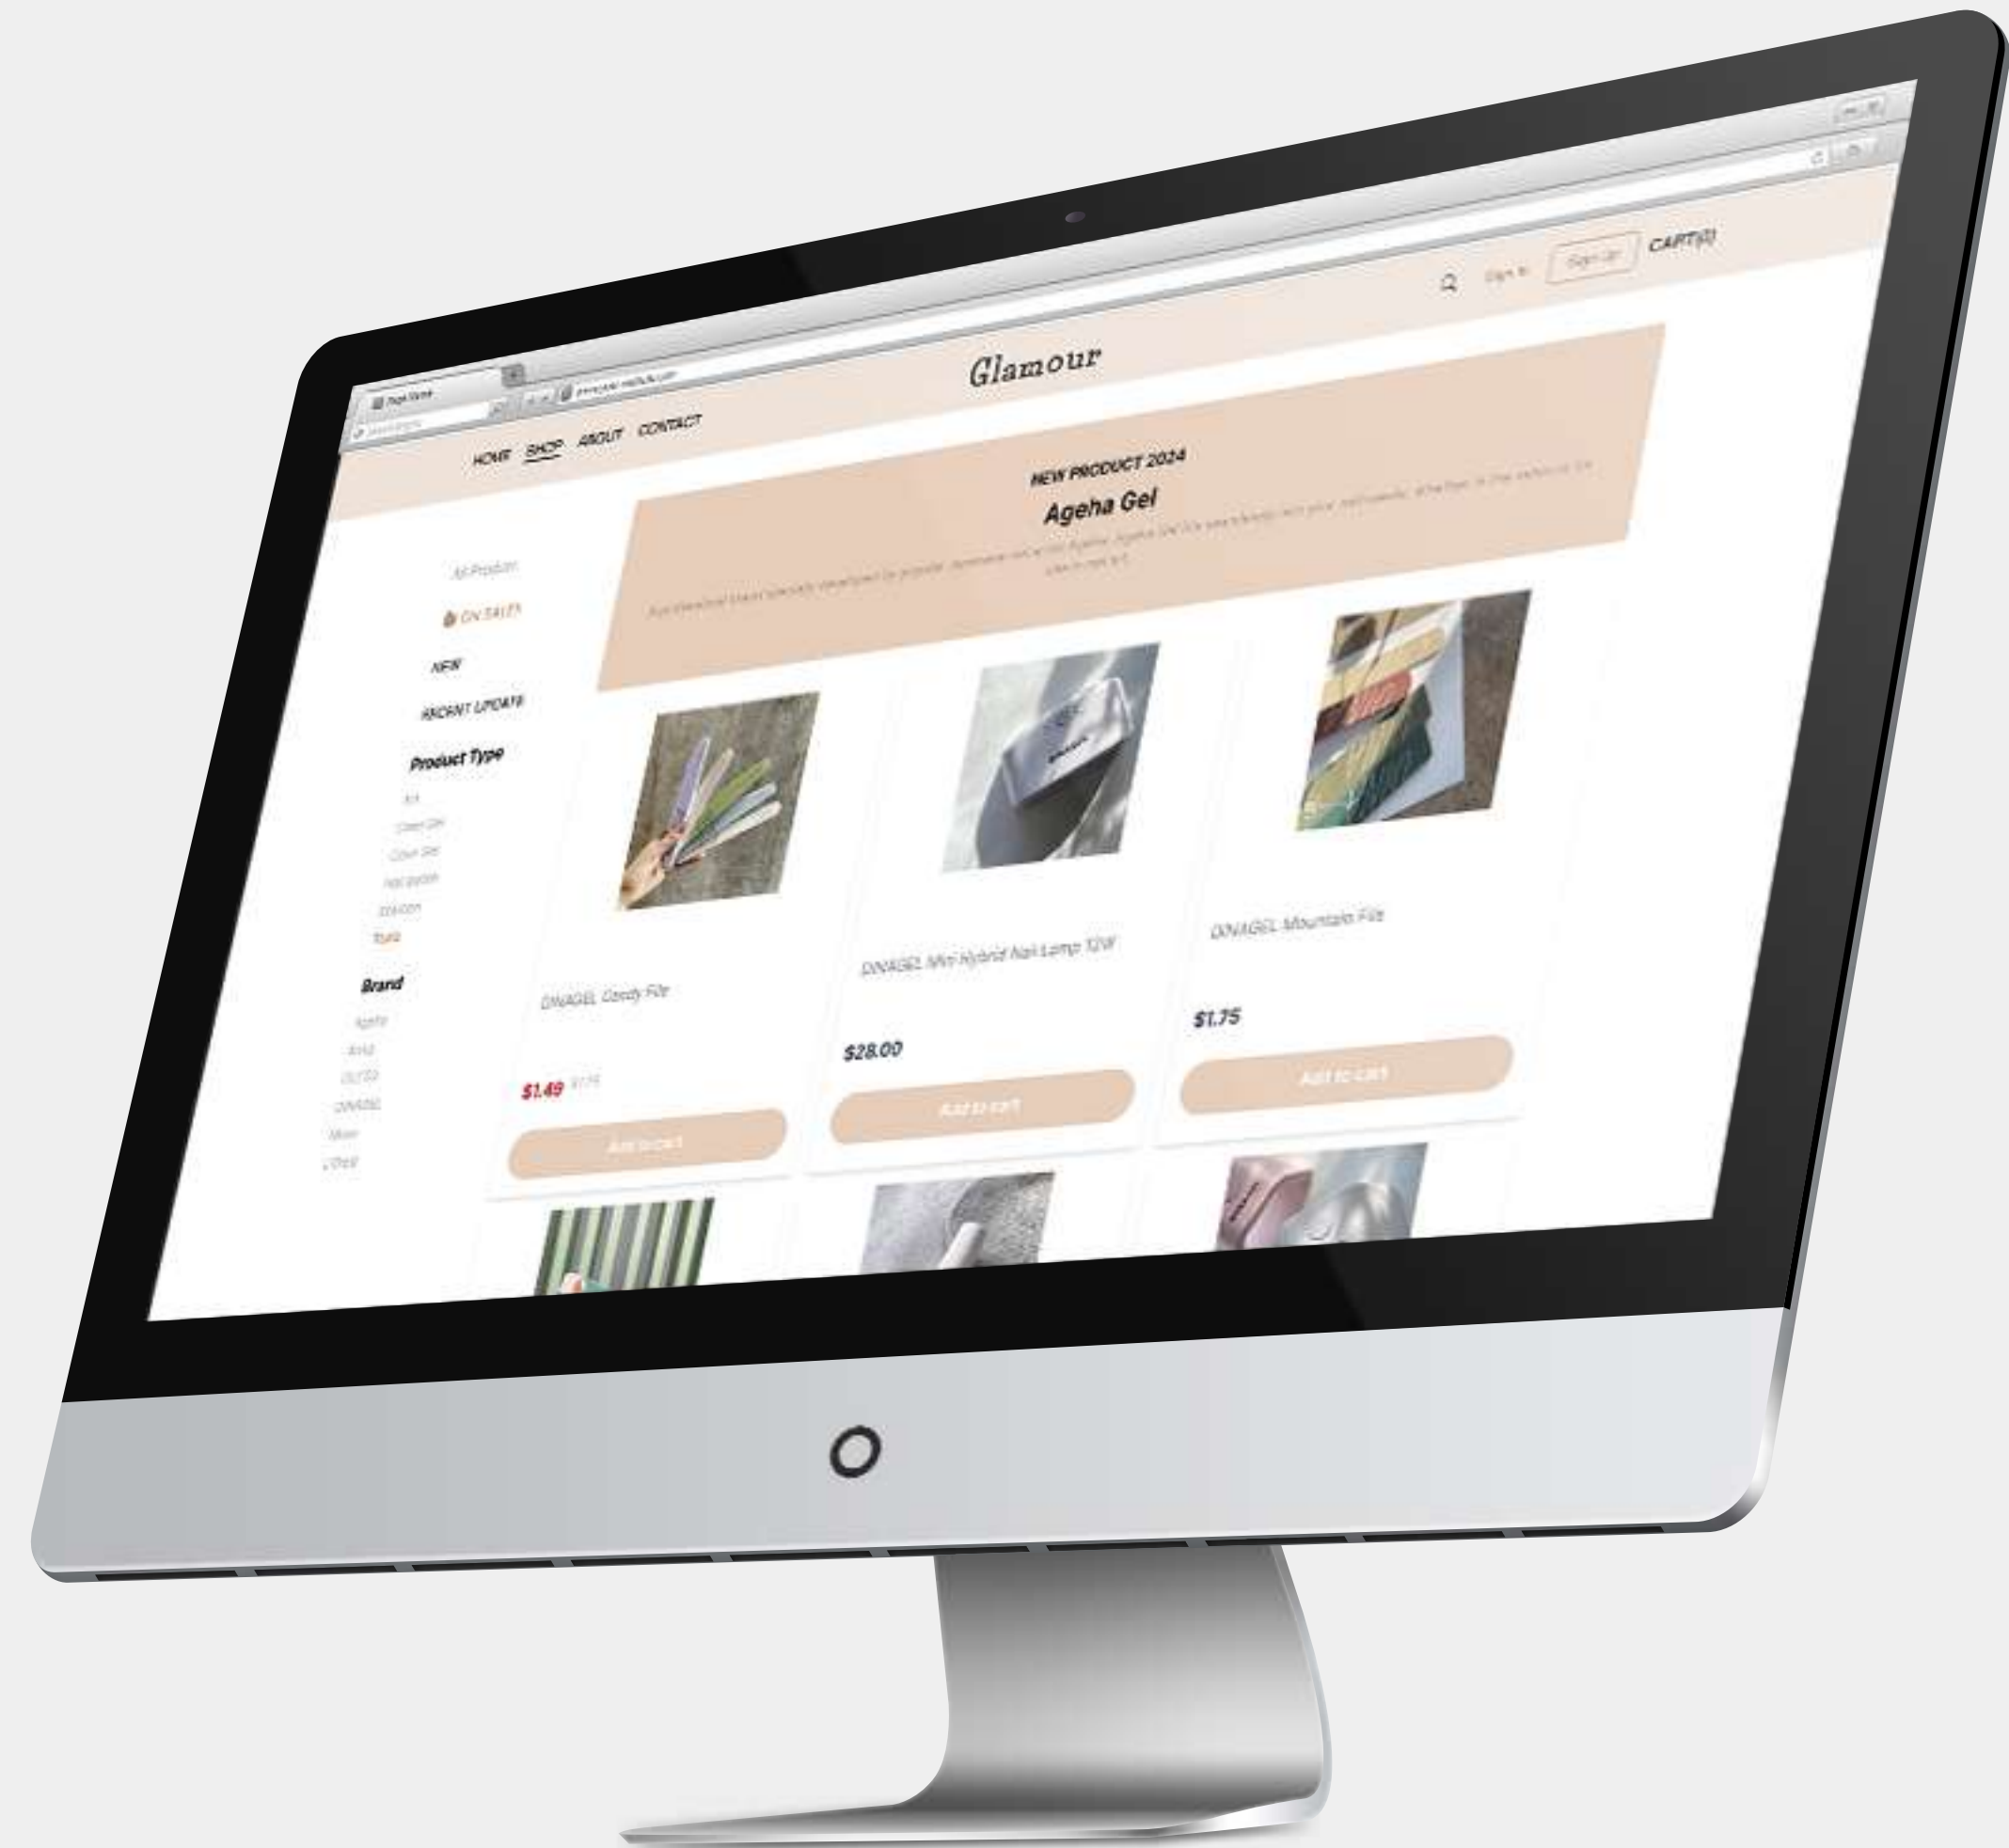

WEB PAGE

E-Commerce Platform

Tech Stack: Ruby on Rails, Stripe, HotwireTurbo,
JavaScript, Github

Developed a comprehensive e-commerce platform aimed at providing a seamless online shopping experience. Leveraged Ruby on Rails for robust backend functionality, integrating Stripe for secure payment processing. Utilized Hotwire Turbo to enhance front-end responsiveness without the need for complex JavaScript, ensuring a fast and efficient user experience. Managed the project and version control using GitHub, which facilitated collaborative coding and streamlined updates. This project not only honed my full-stack development skills but also deepened my understanding of web application architecture and e-commerce systems.

Na Feng

E-commerce Platform: Glamour

Glamour is a Ruby on Rails e-commerce platform for nail polish sales, featuring products, user reviews, and secure checkout. I implemented Active Admin for site administration, Active Storage for file management, and integrated Stripe for payments, enhancing the shopping experience with real-time cart updates using Turbo.
